

Satellite Series

The Satellite mobile dispensing system offers a low-cost, portable means of accurately diluting concentrated cleaning products for use in mop buckets, sinks, auto scrubbers, tanks, and other containers.

Features

- ▲ Mobile: Take it anywhere! You don't need to attach it to a wall or buy a cart - it goes anywhere you can find water and carry your chemical container!
- ▲ Adjustable product connection allows use with both F-style and round containers: 1/2 gallon or gallon, 2 liter or 4 liter, F-style or round - the Satellite adjusts to virtually any bottle size. Use the forward connection position for F-style containers, the rear connection position for round containers. Either way, you're perfectly balanced!
- ▲ Fits virtually any cap: The Satellite comes with a 38mm cap connection, the standard in the industry. If you have a special size cap - send it to us and we'll assemble a model for you (minimums apply).
- ▲ Includes exclusive E-gap eductor technology: ASSE 1055-B approved eductors eliminate backflow and regulatory concerns.
- ▲ Includes AccuPro pressure regulation technology (patent pending): No more fluctuating dilution rates as water pressure varies - with the new AccuPro technology, your dilution rate is always consistent, across a wide range of pressures. And that means your product performs as it's supposed to!

Features (cont.)

- ▲ Handy On/Off trigger: Easy to operate with one hand, no matter how large or small your hands are.
- ▲ Convenient locking button: Activate the Satellite with the On/Off trigger, then lock it in the "On" position - all with one hand!
- ▲ Overmolded handle: For safe, sure gripping.
- ▲ Built-in hanger: Allows you to quickly and easily attach the Satellite to your bucket or scrubber.
- ▲ Adjustable velcro strap for container stability: Allows you to secure either an F-style or round bottle to the Satellite for better balance.
- ▲ Multiple dilution rates: Pick from 14 different dilution rates using the metering tips included with the Satellite. (Additional tips available)
- ▲ Easy connections to water source: Use one of the optional connectors for quick and easy access to almost any water source.

Use it Anywhere

There's an application for the Satellite proportioner in almost any cleaning environment:

- ▲ Full Service Restaurants
- ▲ Quick Serve Restaurants
- ▲ Convenience Stores
- ▲ Health Care
- ▲ Contract Cleaning
- ▲ Food Service
- ▲ Facility Management
- ▲ Retail Stores
- ▲ Malls

Satellite Model Information

Model	Description	Flow Rate	Approximate Dilution Range	
			Max	Min
5843	Initial container position set-up for F-style containers	3.5 GPM	300:1	10:1
5844	Initial container position set-up for round containers	3.5 GPM	300:1	10:1
